A series of singular dependent claims is permissible in which a dependent claim refers to a preceding claim which, in turn, refers to another preceding claim.

A claim which depends from a dependent claim should not be separated by any claim which does not also depend from said dependent claim. It should be kept in mind that a dependent claim may refer to any preceding independent claim. In general, applicant's sequence will not be changed. See MPEP § 608.01(n).

Claims 7-34 are objected to for being unduly difficult to sort out. The guidelines above should be followed.

Claims 5-6, 9-14, 17-22 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on December 15, 2003.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1 and 16/1 are rejected under 35 U.S.C. 102(b) as being anticipated by Johnson.

Johnson shows a gas line mounted on a rail 42 and discloses as column 12, lines 18-29, that each line can be mounted on a transverse rail.

Claims 1-4, 7-8, 15-16 and 29-34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Johnson in view of Itoh et al. Johnson shows the claimed device except uses tubing connected fluid handling devices. Itoh et al show an improvement over tubing connecting fluid handling devices with coupling blocks 21 for mounting the

Art Unit: 3753

fluid handling devices. It would have been obvious for one of ordinary skill in the art at the time the invention was made to have configured the Johnson gas line from such modular components as taught by Itoh et al to reduce costs, for example. The provision of a spare rail for future use is considered to be an obvious expedient. The method of assembling and method of using steps of claims 30-34 are seen to be inherent to the disclosed structure.

Claims 23-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Johnson in view of Itoh et al and further in view of Markulec et al.

Johnson, as modified, shows the claimed device except for the shape of the tracks.

Markulec et al show a gas stick system with a downward tapered groove and nut, see Figure 6a. It would have been obvious for one of ordinary skill in the art at the time the invention was made to have used such a downward tapered groove and nut in the system of Vu et al, as modified, in view of the readily apparent equivalence between the two tracks.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John Fox whose telephone number is 571-272-4912. The examiner can normally be reached on Increased Flextime.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Blau Stephen can be reached on 571-272-4406. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Application/Control Number: 09/893,522
